IDEG's Vision

IDEG is a digital asset financial services group headquartered in Hong Kong and an office in Singapore.

IDEG's vision is to enable a sound and prosperous financial future for our clients, uncompromised in our pursuit of excellence through continuous innovation, superior service, adherence to compliance and regulations, and trouble-free access to digital asset products and services.

IDEG aims to achieve this by providing best-in-class asset management, trust and fiduciary services, focusing exclusively on digital assets.

About IDEG

- Our asset management business is focused on providing innovative, industry-leading products across a multi-strategy digital assets investment platform. Our target clients are leading family offices and institutions. Our trust business is focused on providing fiduciary, custody and trust services, with an increasing focus on digital asset services.
- IDEG prides itself on its strong corporate culture, inspiring trust for our clients and fostering a sense of community, with a common goal to revolutionize the financial world through innovative digital assets.

Our partners

IDEG Elite Program

We believe that blockchain technology and cryptocurrencies are the driving innovation and will transform financial markets and personal finance. We have designed the **IDEG 2022 Crypto Elite Program** to help accelerate IDEG's path to success whilst growing and enhancing the industry as a whole.

With this program, we seek to empower young talent who show a curiosity and passion for the blockchain and crypto space to equip him/her with hand's on experience, alongside industry professionals, to chart a path towards a successful and fulfilling career in this transformative sector.

Program outline and highlights

- We will put you into one of the four key business pillars below:
 - **Investment**
 - **Strategy**
 - **Structured products**
 - **Trading**
- You'll be immersed into a leading digital assets management platform, supervised and trained by industry experts, to build working knowledge and hands on skills.
- You'll be thrust into a vibrant entrepreneurial environment that celebrates new ideas and pioneering spirit, surrounded by like-minded colleagues, who want to shape the future of finance.

Program outline and highlights

Investment

- Portfolio management.
- Investment research.
- Bring together traditional investors and digital assets.

Strategy

- Model and implement multi- strategy investment portfolios.
- Including, but not limited to quantitative trading, CTA-style, yield farming strategies.

Structured Products

- Design structured products with a variety of active strategies and underlying assets.
- Provide institutional-grade client services experience.

Trading

- Provides institutional clients with efficient transaction execution and better pricing across the markets.

Selection criteria

You show curiosity and passion about blockchain and crypto, with a strong desire to pursue a professional career in the industry

Have 3-8 years work experience in a leading traditional financial institution (hedge fund, investment bank, asset manager, etc) or in a digital assets company. Fresh graduates may be considered on a case-by-case basis.

Are a graduate from a top tier university with overseas exposure and outstanding academic performance

You are results-oriented, resilient, collaborative, entrepreneurial, and dare to dream big!
